Industrial Water Purification

Water Quality Monitoring Handheld Test Instruments

For the Manager/Engineer

Oakton Testr® Series Instruments

TDS – pH – ORP – Temperature

Miniature 1.5V batteries and microelectronics provide these compact instruments with performance comparable to more expensive bench top units.

These rugged, waterproof instruments fit right in your pocket, briefcase or purse. Microprocessors make all readings fast, stable, and repeatable.

All features are accessed from splash-proof keypads with keys that click to confirm operation.

TDS pH ORP Temp.
Oakton Testr® Instruments

Oakton Testr® Instrument Features:

- Rugged Valox® housings insure good chemical and physical durability.
- Instruments are waterproof and will float.
- Units come with cap for protection and to act as a test cup.
- Displays full 3 and 4 digit LCD readings
- To freeze readings, use the HOLD function (pH & ORP)
- Automatic temperature compensation (TDS, pH & ORP)
- Accuracy:
 - TDS to 1 ppm, 1 μ S – OR - 0.01 ppt (Depending on Model)
 - pH \pm 0.2 pH
 - ORP calibration of \pm 5 mV
 - Temperature \pm 1 Degree C or F
- Sensors:
 - TDS instrument features stainless steel electrodes for long life.
 - pH instrument features a clog-resistant Kynar® junction.
 - ORP instrument features Large surface area platinum band sensor
 - Temperature instrument features a long 316L SS probe.
- Auto ranging quickly switches unit to correct range
- Auto-off function conserves batteries
- Easy push-button calibration
- Low cost NIST calibration solutions available in handy pouch or bottles.

Oakton Warranty: Oakton Testr® Series units are warranted against defects from manufacturing for 6 months from the date of purchase. Warranty does not include expendables such as batteries or calibration solutions. Warranties are specifically limited to the repair or replacement of the equipment only. Note: The Oakton pH Testr® is not recommended for long-term use with heavy metals, sulfides and organics. Other Oakton® heavy-duty hand held units are available for these applications.

For The Production Floor

Breakage is one of the major causes of failure in a typical pH or conductivity instrument. The **Myron-L DS and pDS Meters** provide maximum protection for both the meter body and sensors.

Myron-L's DS and pDS Meters are lightweight and compact yet tough, with rugged, taut-band meter movements.

Both the Myron-L DS and pDS meters have multiple Conductivity/Resistivity/ppm ranges

pDS meter features a user-replaceable pH electrode with a liquid junction.

Model DS-532T2
TDS water quality in
ppm/ μ S/ μ mhos

Model pDS-T2/pH
pH and TDS water quality
in ppm/ μ S/ μ mhos

QC and R & D Lab Techs

The **ULTRAMETER™** is a true 21st century instrument that does the job of four, five or even six instruments while delivering accuracy of $\pm 1\%$ on all parameters with its powerful microprocessor-based circuitry.

ULTRAMETER™ Features:

- Four-digit LCD display for high resolution on all levels.
- Automatic temperature compensation and range selection.
- Factory calibrated with NIST traceable solutions
- Optional certification with NIST traceable solutions.
- Auto shut-off maximizes 9 volt battery life
- Non-volatile microprocessor provides data back-up, even when the battery is changed to assure that all calibrations and memory data are retained.
- All calibrations are quickly accomplished by keys.
- ULTRAMETERS are IP67/NEMA 6 rated and can be fully immersed in water, but because they are lightweight (only 13.5 oz/383 g), they float!

ULTRAMETER™

pH/ORP/Temp

Myron L Limited Warranty - All Myron L Meters have a two-year warranty, except for pH sensors, which have a six-month limited warranty. Warranty is limited to the repair or replacement of the meter only, at the Myron L Company's discretion. The Myron L Company assumes no other responsibility or liability.

Cal Water has been selling, installing and servicing water purification equipment since **1946**.
